DETAILED ACTION***Notice of Allowability***

1. Claims 1-8,10-14,16-29 are allowed over the prior art of record. The claim limitations that are not met by the prior art of record deal with placing tags that delimit a grammar structure with the grammar tags as part of defining a grammar for speech recognition. With respect to the prior art of record, Brown et al (6587822) teaches a speech recognition interface for a speech recognition engine using compiled grammar (col. 3 lines 1-10) in a HTML environment (col. 13 lines 43-51; col. 14 lines 17-21). Ladd et al (6470317) teaches the use of start and end tags in a markup language setup applied to the grammars (col. 16 lines 29-40) and subtag structures with the grammar (Brown et al (6587822), col. 13 line 25 – col. 14 line 64), Parks (6038573) teaches name attribute based rule tags (col. 7 lines 9-25) used to delimit/mark the grammar (col. 17 lines 4-14). However, none of the prior art of record fairly teaches the claim limitations of the independent claims as noted above. Furthermore, as per the most recent interpretation of the Interim Guidelines regarding 35 U.S.C. 101, claims 1-8,10-14,16-29 a statutory processes because the claimed computer storage medium encoded with computer readable instructions causing a computer to perform grammar engine functions, and that the referred to computer storage medium does not pertain to the communication media (disclosed on page 7 of the specification).
